DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bielik Jr. et al. (US 6,212,859) in view of Shuster (US 4,395,254).

Bielik Jr. discloses a device for continuously producing packages comprising heat sealing top of packages by rotary heat sealer/thermal rolls 80 and 108; and multiple conveying devices; see figures 1 and 15. Bielik Jr. does not directly disclose the thermal roll 108 having annular projections on the circumference in the shape of a continuous wave or zig-zag, however Shuster teaches a heat sealer 132 with annular projections 134 in any desired shape column 6, line 65 – column 7, line 2.

It would have been obvious to one of ordinary skill in the art to use the teachings of Shuster in the invention of Bielik Jr. in order to create a wavelike seal.

Response to Arguments

3. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
